

SKANBATT Dual Purpose 12V 100Ah 970CA +R

Dual Purpose Battery - Starting and Leisure Use

The SKANBATT Dual Purpose battery is designed for applications where both reliable engine starting and stable power supply for onboard equipment are required. It is particularly well suited for motorhomes and other leisure vehicles where space is limited and one battery must handle multiple tasks. The battery delivers strong starting power while also supplying energy for onboard equipment such as lighting, pumps, control systems and other electrical loads commonly used in leisure vehicles.

Key Features

- Dual purpose design for both starting and auxiliary power
- Strong starting performance for reliable engine starts
- Stable energy supply for onboard equipment
- Common fitment for many European motorhomes (DIN LN5 size)
- Maintenance free construction
- Suitable for leisure and recreational vehicles

Technical Specifications

Parameter	Specification
Nominal Voltage	12 V
Capacity (20h)	100 Ah
Starting Performance (CA)	970 CA
Cold Cranking Amps (EN)	840 A
Cold Cranking Amps (SAE)	800 A
Reserve Capacity (RC)	180 minutes
Dimensions (L x W x H)	353 x 175 x 190 mm
Weight	22.2 kg
Terminal Type	SL
Polarity	+R (A(-,+))
Hold Down	B3
Construction	Sealed maintenance free lead-acid battery

Charging Recommendations (25C)

- Recommended charging voltage: 14.4 V
- Float / maintenance voltage: 13.5 - 13.8 V

- Temperature compensation recommended (approx. -24 mV per C for 12 V systems)
- Use a quality charger suitable for sealed lead-acid batteries
